Art Unit: 1653

Claims 1-16 have been cancelled. Claims 17-116 are currently pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-28, 30-36, 38-47, 49-53, 55-59, 61-74, 76-81, 83-90, 92-99, 101-107, 109-114, and 116, drawn to polypeptide SEQ ID NO: 2, classified in class 530, subclass 350.
- II. Claims 29, 37, 48, 54, 60, 75, 82, 91, 100, 108, and 115, drawn to a method for the recombinant production of the protein SEQ ID NO: 2, classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP§806.05(f)). In the instant case traditional synthetic protein synthesis, for example.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
